

THE SERVICE

Our service doesn't begin when you receive your Übermilk, but instead starts immediately at our manufacturing site. Every Übermilk goes through extensive test runs to ensure that your device works perfectly.

THE PROMISE

Our promise: The smooth operation of your daily business is our priority. If we can't solve any issues with your machine by phone, you've got the option to be quickly provided with a backup. Our own production, sales and distribution allow us to serve our clients in a perfect way.

MILK FOAM AT THE PUSH OF A BUTTON

ÜBERMILK – UBER GOOD

Übermilk is the innovative milk frother for baristas and restaurateurs who demand high standards of quality and operating efficiency. Create first class latte art milk foam for up to 250 drinks per hour – by simply pressing one button.

It doesn't matter if you are working under high pressure and the line keeps getting longer and longer. With our Übermilk your baristas can focus on customer interaction, the perfect espresso shot and latte art as well.

The hygienic and slow heating cycle always brings the milk to its "sweet spot", the point where milk reveals its full sweetness and turns into a perfect cream. Not too hot nor cold, not too fluid nor foamy – our milk foam impresses from the first to the last cup.

IT'S SO EASY...

Milk frothing becomes a piece of cake: Place a pitcher, glass or mug under the spout, select a pre-defined quantity and out comes perfect milk foam.

AND SO CONVENIENT

Increase your output by taking the load off of your baristas.

AND OF COURSE SO GOOD

Perfect milk foam from the first to the last cup, no matter what drink you are serving.

- ① Perfect milk foam anytime
- ① Infinity mode for your peak periods
- ① Individual quantities keep food costs down
- ① Intuitive One Touch Display
- ① Hygienic Milk Frothing
- ① Simple semi-automatic cleaning
